DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-6, 20-30, 35 and 36, drawn to a positional information transmission method of transmitting position information from a transmission side to a reception side provide with a digital map...., classified in class 701, subclass 208.

Group II, claim(s) 7-10 and 18, drawn to a positional information decoding method of decoding positional information of a digital map...., classified in class 714, subclass 752.

Group III, claim(s) 11-17, drawn to a positional information creation method of creating the position informational of a digital map...., classified in class 701, subclass 207.

Group IV, claim 19, drawn to a positional information specifying method of using information...., classified in class 701, subclass 213.

Group V, claim(s) 31, 33 and 37, drawn to a program for causing an information providing device to provide positional information for a digital map...., classified in class 701, subclass 216.

Art Unit: 3664

Group VI, claim 32, drawn to a program product for causing an information serving device to provide positional information for a digital map...., classified in class 701, subclass 214.

Group VII, claim(s) 33 and 34, drawn to a program for causing an information application device to receive and utilize positional information for a digital map...., classified in class 701, subclass 216.

2. Inventions I-VII are related as combination and subcombination. In inventions in this relationship are distinct are distinct if it can be shown that (1) the combination claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the details of the subcombination as separately claimed are not set forth in the combination. The subcombination has separate utility such as a a positional information transmission method of transmitting position information from a transmission side to a reception side provide with a digital map...

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Applicant is reminded that upon the cancellation of claims to a non-elected

Art Unit: 3664

invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. A telephone call was made to Mr. Jeffrey J. Sopko Reg., 27,7676 on Friday, July 3, 2009 to request an oral election to the above restriction requirement; however Mr. Jeffrey J. Sopko was not available to elect.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to MCDIEUNEL MARC whose telephone number is (571)272-6964. The examiner can normally be reached on 6:30-5:00 Mon-Thu.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Khoi Tran can be reached on (571) 272-6919. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
